

Hospital to Home Alliance of Ventura County

The Hospital to Home Alliance of Ventura County is a group of seven home health agencies working together with 3 local hospital systems and community-based organizations. We are working together to provide an enhanced home health care experience when you go home from the hospital.

This type of specialized care will help you go home with ease, knowing that you will get the quality care you need. *When a discharge date from the hospital is chosen*, a home health clinical liaison from one of the agencies *you have chosen* will contact you 1-2 days before you go home to:

- **Review your care needs & answer any questions you may have** to make sure you keep getting better
- Tell you about the **home care services you can expect**
- Let you know **when and how often you will have a home care visit**
- Tell you **how to reach the agency and clinicians** if needed

The agencies selected for the Alliance offer greater levels of care than other home health agencies in the region. One of these improved service offerings is the ability to offer a home health visit to patients within 24 hours of a hospital discharge.

In addition to the first visit and any other services your doctor has ordered, you will get a **“check-in”** call between visits from **one of our home health agencies** to talk about any issues or questions you have.

Our goal is to make sure you have safe quality home care to help you get better and keep you from going back to the hospital.

The following Home Health Agencies are participating in this alliance:

● Access TLC Home Health & Hospice	805 517 1620
● Assisted Home Health & Hospice	805 677 2100
