Brad Willits	<i>Secretary</i>	
Bonnie Subira		
Ryan Goldberg	<i>Chair</i>	
Sally Grove		
Renee Jones		
Cindy Jordan		
Laura Zarate		
Lynette Harvey		

TOPIC	DISCUSSION	Action Items	Responsible Party(ies)
	Lindsey Holland to be the new HSAG rep at these meetings	n/a	
Readmission Rates calculation	How can we all do this the same way? For sure won't use HSAG data...takes too long and inaccurate methodology. We pull one given month. When that month closes, wait 30 days later, then begin the calculation for that prior month. We want to report this quarterly, broken down by month, and provide it at our quarterly meeting. This should be ready within 45 days of the close of that given quarter.	This to be sent in the mailer	Rene
LOS	How do we want to approach LOS? Clean slate and move forward... Total discharges in a given month, then divide this into total number of days for those same patients. Facility X had 9 discharges in March. They totaled 200 days in that same month. I now divide the total days by that number of d/c'd patients and this is my ALOS. This equals 22.22 days.	This to be sent in mailer	Rene
LOS Outliers	This is to teach what our acuity really is. Can we provide the LOS, but when reporting, list the number of outlier patients (>45 days). Please list both MedA and Med Advantage outliers and the reason (G-tube, IVs, therapy needs, etc).	This to be sent in mailer	Rene
CALTCM	Can we get hospital docs into SNF? Can we get more physician eyes on patients?		
Next review	Third Thursday in May to cover Q1.
